

Windows 7 Deployments: How can EACS Services Help ?

- **Consulting and Deployment: Direct Access**
Direct Access requires the deployment of Microsoft Windows 2008 R2 Server. EACS can provide pre-sales advice, consulting and deployment services to enable your organisation to fully utilise the benefits of Direct Access while experiencing the efficiency improvements of mobile working.
- **Audit: BranchCache**
EACS can audit your existing VPN solution commitments (for example appliances) and demonstrate the performance and efficiency improvements which will be achieved through BranchCache.
- **WAN Utilisation: BranchCache**
We can produce bandwidth utilisation reports in order to validate the improvements Microsoft Windows 7 BranchCache would deliver.
- **Proof of Concept/Application Testing: Microsoft Windows 7 XP Mode**
EACS can provide proof of concept and application testing for your specialist and bespoke applications in order to provide evidence of a seamless migration for your legacy applications.
- **Policy Creation and Management: AppLocker, BitLocker and BitLocker To Go**
We will assist your organisation in creating group, individual and granular security policies around allowable applications, USB sticks and portable hard-drives.

Generic IT Services:

- **Migration:** EACS can help build images and assist with a Windows 7 migration by means of a full project outsource or targeted external assistance.
- **Consulting:** our consulting based services will help you understand and justify the return on investment which will be achieved when your organisation migrates from your existing desktop operating system to Microsoft Windows 7.
Audit: We can provide local or global auditing services in order to help you understand your IT estate and achieve licence compliance.
- **Live Environment:** See Windows 7 deployed in a live environment by visiting EACS, where we have been using the system for over two months.
- **Service Desk:** We can provide service desk, on-site and floor walking based support at first, second and third line level both during and post migration to Microsoft Windows 7.
- **Training:** EACS has a dedicated training division, known as Harvard Training, which provides public scheduled courses, closed courses and one to one courses at a location to suit you. Microsoft Windows 7 training is based around deployment and operation from both an administrator and end user perspective.
