

Good Mobile Messaging™

Manage device security and access—from virtually anywhere.

Good Mobile Messaging secures enterprise email, calendar, and contacts for delivery—in real time—to the handheld devices and platforms your employees want.

For mobile professionals, staying productive means staying connected to co-workers, customers, and partners. Good Mobile Messaging maximizes user access to mission-critical data, while making management and compliance a breeze for IT managers. Good Mobile Messaging minimizes the cost and complexity of security, support, and deployment across your entire mobile fleet.

END-TO-END SECURITY

Good Mobile Messaging provides enterprise-class, end-to-end security that protects the enterprise firewall, over-the-air (OTA) transmissions, and the

smartphone itself. Data transmissions and sensitive data on the mobile device are secured with industry standard AES encryption. All Good servers are deployed behind the firewall with a secure outbound connection using standard port 443.

VISIBILITY AND CONTROL OF YOUR ENTIRE FLEET

As part of the Good for Enterprise platform, Good Mobile Messaging deployment is fast and straightforward. Good Mobile Messaging is fully integrated by using the web-based Good Mobile Control™ portal, making it simple for IT managers to manage policies, settings, installations, and upgrades with robust wireless OTA capabilities. You can minimize troubleshooting and support costs with complete, real-time visibility into your entire mobile deployment, including hardware type, ROM version, software versions, and even handheld radio status. You'll spend less time managing desktop software and manually tracking mobile devices and more time enabling connectivity and access.

“With Good for Enterprise, we realized we could have the best of both worlds—the security and management IT requires, and support for the popular devices employees want.”

Phil Hornback, Infrastructure Manager, Server Technologies
Costco

“ Just like the sport we live and breathe, our business is every bit as competitive. Good gives us the edge we need to compete and win. ”

Ray Dzek, Network Operations Manager
Specialized

MOBILE END-USER BENEFITS

FEATURES	BENEFITS
Email support	Create, send, receive, delete, file, search, and sort email; synchronize email sub-folders, and filter email by unread, flag, or more
View preferences	View email via preview pane or single- or double-line display, as well as by email “conversation”
RSS news feeds	Stay up-to-date on news and information; integration with email and PIM makes it easy to read the latest news and share RSS news feeds
Full calendar support	Respond to meeting requests, check free/busy status of attendees, and view by day or by month
Contact management	Add, delete, edit, and search contacts; access your corporate directory

IT BENEFITS

FEATURES	BENEFITS
Security	No inbound firewall hole; remote control of password policies and handheld components such as cameras and Bluetooth; ability to enforce IT policy compliance and to prohibit use of certain handheld applications
OTA Management and Administration	OTA deployment, upgrade, and policy management eases burden on IT; management dashboard provides a complete view of your mobile deployment, including users, by device type and OS version
