- **ISO 27001** Information Security Management System (ISMS)

Solutions & Services

- Staff awareness
- Training & certification
- Assessment services
- Transformation services
- Accreditation
- Maintenance & renewal

In today's fast-paced, connected world, where information is at the heart of most organisations, it's more important than ever to pause and consider your security.

Governance provides invaluable processes and framework to define your layers of security and controls. Compliance provides the opportunity for your organisation to demonstrate their status by means of certification and accreditation.

Our Cyber & Security Practice not only helps to protect your systems, but also provides advice and services that ensure you are aligned with the various regulations that are required to trade effectively in your business sector.

Cyber Essentials

Cyber Essentials is a government-backed cyber security certification scheme that sets out a good baseline of cyber security, suitable for all organisations in all sectors. The scheme addresses five key controls that, when implemented correctly, can prevent around 80% of cyber-attacks. The five key controls are:

- Access Control
- Boundary Control
- Malware Protection
- Patch Management
- Secure Configuration

General Data Protection Regulation

The EU General Data Protection Regulation (GDPR) will replace the current Data Protection Act (DPA) and will become fully enforced on 25th May 2018. It will apply to both the UK and the EU, regardless of Brexit.

The GDPR increases the obligations of organisations to protect personal information that they store or process. It will necessitate significant effort by organisations (businesses and public authorities) to change their policies, procedures and data protection governance frameworks in order to comply.

ISO 27001

ISO 27001 is a specification for an Information Security Management System (ISMS). An ISMS is a framework of policies and procedures that includes all legal, physical and technical controls involved in an organisation's information risk management processes.

If you would like help with protecting your systems or complying with regulations, contact EACS on: 0845 3379 146.
