Threat Protection

- 24x7 managed security monitoring (SIEM) powered by BULLETPROOF
- File integrity monitoring
- Data loss prevention
- Intrusion detection / prevention systems
- Web application firewall
- DDoS mitigation
- Combined threat intelligence streams
- Automation and machine learning capabilities
- Compliance reporting

In today's fast-paced, connected world, where information is at the heart of most organisations, it's more important than ever to pause and consider your security.

Our Cyber & Security Practice provides advice and services that ensure you are protected against the ever-changing threat landscape, helping you to predict, prevent, detect and respond.

Our Threat Monitor & Protect service combines managed SIEM with our active protection measures to keep your staff, applications and systems secure, 24x7.

Bulletproof protection against evolving threats

Security Information and Event Management (SIEM) is a complete threat monitoring service for your infrastructure, network and systems. We've combined SIEM with our active threat protection modules to create our Threat Monitor & Protect service which can drastically increase your online security. We work with you to build a custom package that's the best-fit for your business, so you get optimal protection for the best price.

24x7 managed security monitoring (SIEM)

Intrusion detection and prevention (IDS/IPS)

File integrity monitoring & data loss prevention

Flexible package to suit your specific needs

24x7 Cyber security

Our Security Operations Centre (SOC) combines state-of-the-art threat monitoring technology with real-world security expertise. Our team of security analysts constantly monitor your systems, ready to step in with full incident management procedures the moment a potential security threat is detected.
