- **RTO**—Recovery Time Objective
Time to restore service
- **RPO**—Recovery Point Objective
Time of last data sync
- **Snapshot**
Point in time capture of your data
- **Replication**
The transfer of your data to another location
- **DRaaS**
Disaster Recovery as a Service

Availability is a challenge

A Disaster Recovery strategy isn't just a nice-to-have – it's **essential** for the survival of your business. It can also be a matter of meeting regulatory compliance standards. Regardless of whether you're obligated by law to have a business continuity plan, you owe it to the future of your organisation to have one. Managing DR can be technically challenging and time consuming, and not all organisations have the skills, time or infrastructure to do it—EACS can help you.

What is the impact?

Few people truly understand the true cost of your downtime. Some studies show 80% of businesses who are not adequately prepared will never recover from a disaster.

EACS supports organisations with wide-ranging challenges, from the critical care of children to real-time financial trading organisations. Each has different challenges and needs, but one theme is common - outages cost them, whether it be financially, operationally or reputationally.

Let the experts take care of it for you

Disaster Recovery is about understanding impact and balancing risk. EACS understands that not every business needs real-time availability and so it offers flexible approaches to protection that suit your **RTO** and **RPO**.

DR is far more than just protecting your systems—you need absolute confidence that you can access them when you most need them. That's why EACS' service includes continuity planning services and failover testing, ensuring if disaster strikes, your business is prepared.

DISASTER RECOVERY AS A SERVICE

Uptime, all the time

A layered approach

We know that Disaster Recovery is just one part of the puzzle. EACS offers availability services including:

- **Managed Backup** services to keep your data secure and protected
- **Workplace Recovery** to ensure you can still serve your customers even if you can't get to your office
- **Proactive Managed Services** that make sure your infrastructure is in tip-top condition
- **Cyber Security** services to help you protect against ransomware, viruses and other threats

Your journey to data protection starts here

Whether it's a weekly snapshot of your environment, or synchronous replication to a warm standby facility, EACS' DRaaS can help. Contact EACS today to assess your needs, improve your uptime and lower your costs.

EACS is the expert in the delivery of IT services to the mid market. It is an award winning and trusted provider of IT solutions and managed services to a wide range of UK organisations of all sizes. Founded in 1994, EACS supplies practical, innovative and cost-effective IT products, solutions and services to businesses. Solutions include infrastructure, end user computing and systems management. Our services range from ad-hoc consultancy, support and training through to fully managed or hosted IT systems. Partnerships with market leading manufacturers means EACS is positioned to provide organisations with the highest level of expertise and quality.
