Services

- Staff awareness
- Training & certification
- Assessment services
- Transformation services
- Accreditation
- Maintenance & renewal

In today's fast-paced, connected world, where information is at the heart of most organisations, it's more important than ever to pause and consider your security.

Governance provides invaluable processes and a framework to define your layers of security and controls. Compliance provides the opportunity for your organisation to demonstrate their status by means of certification and accreditation.

Business Value

Our Cyber & Security Practice not only helps to protect your systems, but also provides advice and services that ensure you are aligned with the various regulations that are required to trade effectively in your business sector.

Overview of Service

Cyber Essentials is a government-backed cyber security certification scheme that sets out a good baseline of cyber security, suitable for all organisations in all sectors. The scheme addresses five key controls that, when implemented correctly, can prevent around 80% of cyber-attacks. The five key controls are:

- Access Control
- Boundary Control
- Malware Protection
- Patch Management
- Secure Configuration

The EU General Data Protection Regulation increases the obligations of organisations to protect personal information that they store or process. Organisations have had to put in significant effort (businesses and public authorities) to change their policies, procedures and data protection governance frameworks in order to comply.

ISO 27001 is a specification for an Information Security Management System (ISMS). An ISMS is a framework of policies and procedures that includes all legal, physical and technical controls involved in an organisation's information risk management processes.

Why EACS?

Our cyber experts understand that dynamics of security consideration and compliance.

Vendor agnostic we ensure the technical and operational solutions are right to protect your business and operating environment.

Working closely with our partners we bring leading edge tried and tested security solutions for you to use.

You can be safe and secure with EACS.

EACS is the expert in the delivery of IT services to the mid market. It is an award winning and trusted provider of IT solutions and managed services to a wide range of UK organisations of all sizes. Founded in 1994, EACS supplies practical, innovative and cost-effective IT products, solutions and services to businesses. Solutions include infrastructure, end user computing and systems management. Our services range from ad-hoc consultancy, support and training through to fully managed or hosted IT systems. Partnerships with market leading manufacturers means EACS is positioned to provide organisations with the highest level of expertise and quality.
