

ACTIVE DIRECTORY

Current State Assessment (CSA)

Modern Workplace

Features

- Independent review of the current AD Infrastructure.
- Identify and document where improvements and remediations can be made.
- Document the impact of the improvements and remediations.
- Quotation to implement the recommended improvements and remediations.

Advantages

- Rapid review
- Clear and Concise next steps
- Recommendation & Plan

Benefits

- Clear plan of remediation
- Factually correct

Overview

Part of our overall discovery as a service is a focused review of your Active Directory Infrastructure.

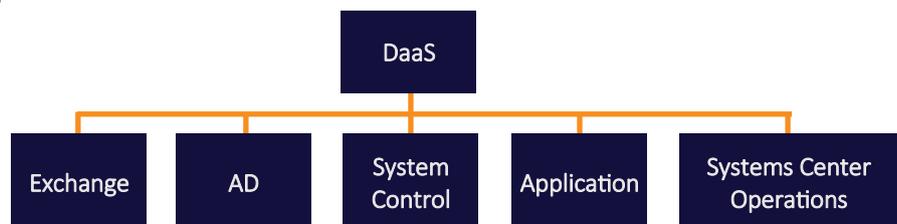

Your Active Directory (AD) infrastructure has been in place for many years and has evolved and grown over time. The ongoing evolution of AD has most likely been implemented by a variety of IT administrators, with varying skill sets and different notions of “best practice”. This will have led to an inconsistent and undocumented structure that has become a large administrative burden, as well as a potential risk to data and system security.

The **eacs** Active Directory CSA will achieve the following:

1. Review the current AD infrastructure.
2. Identify and document where improvements and remediation can be made.
3. Document the impact that the improvements and remediation will have.
4. Provide a proposal and quotation to implement the recommended improvements and remediation to Microsoft’s best practice approach .

High Level Overview

The **eacs** Active Directory Current State Assessment will comprise of the following phases:

1. Onsite Technical Workshop

This is to contain the appropriate client IT staff to determine the following:

- Current understanding.
- Known issues.
- Requirements.
- Future plans.

2. Technical Assessment

This is to determine and document the existing estate, including:

- Domain Controllers
- Operations Master Role Placement
- Site Structure
- OU Structure
- DNS
- DHCP
- Replication Links
- Administrative Rights
- Additional Roles and features (certificate / licensing servers, etc)

ONE TEAM MAKING IT WORK

3. Report & Recommendations

This is to provide a document which includes:

- Overview of Findings and Observations.
- Deviation from Best Practice.
- Issues and Concerns.
- Recommendations and Remediation.

Conclusion

By completing the Active Directory Current State Assessment, you will be in a position to fully understand the risks and challenges posed by the current Active Directory configuration. Once these risks and challenges are understood, a suitable remediation process can be determined to include:

- Active Directory structure.
- Group Policy rationalisation.
- Domain Controller upgrades.
- Security restrictions.
- User & Group creation procedures and automation (with System Center).
- Staff Training.

eacs is the expert in the delivery of IT services to the mid market. It is an award winning and trusted provider of IT solutions and managed services to a wide range of UK organisations of all sizes. Founded in 1994, eacs supplies practical, innovative and cost-effective IT products, solutions and services to businesses. Solutions include infrastructure, end user computing and systems management.
