- Anti-ransomware
- Disk encryption

Server

- Patching
- Anti-virus
- Monitoring

Boundary

- Firewall management
- Web filtering
- Email filtering

Everyday we read stories of ransomware and phishing attacks on businesses large and small. Now it is not **if** it is **when** you suffer an attack.

With that level of inevitability, it is vital to ensure that you don't make life easy for the perpetrators. In addition to protecting against cyber attacks, you must also ensure that you can detect breaches, prevent the spread of any damage and remediate it swiftly.

eacs can help you achieve that.

eacs has a broad range of solutions and services that have been designed to mitigate against common cyber security threats and vulnerabilities. We also have the experts that know how to do this!

Overview of Service

Security cannot be a "tick-box" exercise - it is something that requires regular and on-going maintenance that can be costly for organisations to manage.

eacs' range of Cyber Security Managed Services can help you by performing the leg work required to maintain the security of your systems, giving you peace of mind and allowing you to concentrate on using them for their intended purposes.

Business Value

With the EU General Data Protection Regulation (GDPR), it has never been more important to ensure that your data is well protected. It is only going to become more so over time.

Organisations that handle Personally Identifiable Information (PII) must demonstrate that they take security seriously by keeping systems up to date and putting in place tools and processes that mitigate the impact of a breach.

// ONE TEAM MAKING IT WORK

Additional Services

eacs has a range of solutions and services that follow the proven industry model of Predict, Prevent, Detect and Respond. Discover vulnerabilities in your systems and remediate them, before they are exploited by someone else (predict). Significantly reduce the risk of damage from cyber attacks (prevent). Monitor applications, systems, and networks for intrusions and suspicious behaviour (detect). Recover systems and data; perform forensic analysis and bounce back stronger (respond).

In addition to IT security solutions and services, eacs can help your organisation to attain and maintain Cyber Essentials, ISO27001 and GDPR compliance.

Summary

eacs has long standing relationships with security vendors including DarkTrace, Menlo, Mimecast and Sophos; as well as solutions providers including Citrix, Ivanti and Microsoft. Contact eacs to see how we can help you to prevent attacks and protect against data theft.

eacs is the expert in the delivery of IT services to the mid market. It is an award winning and trusted provider of IT solutions and managed services to a wide range of UK organisations of all sizes. Founded in 1994, eacs supplies practical, innovative and cost-effective IT products, solutions and services to businesses. Solutions include infrastructure, end user computing and systems management. Our services range from ad-hoc consultancy, support and training through to fully managed or hosted IT systems. Partnerships with market leading manufacturers means eacs is positioned to provide organisations with the highest level of expertise and quality.
