**CYBER SECURITY**  
PREDICT, PREVENT, DETECT, RESPOND

eacs security services can help keep your organisation safe. We provide solutions that ensure you are protected against the ever changing threat landscape and follows the proven industry model of Predict, Prevent, Detect and Respond.

- 1 PREDICT**  
Using our Penetration Testing and Vulnerability Assessments, we can discover and highlight vulnerabilities before they are exploited.
- 2 PREVENT**  
From Anti-Ransomware protection to Authentication services, eacs can help to mitigate against weaknesses in your organisation, giving you peace of mind.
- 3 DETECT**  
eacs's Threat Detect service provides a 24/7, 365 days a year incident response team to identify threats and notify the appropriate contacts.
- 4 RESPOND**  
Our respond services can recover your data and systems quickly and provide preventative action to reduce the risk of an attack happening again.

For more information about the security services eacs provides, visit [www.eacs.com/services/cyber-security/](http://www.eacs.com/services/cyber-security/) or call 0800 8047 256

### Overview

Are you concerned about your business's resilience in light of the many high profile cyber-attacks?

eacs' OptimiseSecurity services are tailored to satisfy any business vertical and provide wide-ranging protection of your infrastructure and data, whether on-premises, in the cloud or both.

### OptimiseSecurity 90°

Our 90° package provide entry-level security management for organisations beginning to review their security posture. eacs will conduct a review of your current security posture and provide ongoing endpoint and server management using our industry leading Virus Protection solution.

### OptimiseSecurity 180°

The 180° offering provides a robust suite of protection, including advanced Anti-Ransomware capabilities and best of breed Web and Mail Security and Anti-Spam. Alongside a review of your current IT Security policies and procedures, receive tailored training for your staff on how to protect themselves and begin the journey into automated breach and attack simulation, augmented with penetration testing.

### OptimiseSecurity 360°

eacs' 360° service builds on the 180° package to provide comprehensive visibility and protection for those with a more in-depth security focus. It includes 24x7 Managed Threat Response in the event of a security incident, Data Loss Prevention and insider threat email protection, and automated testing of zero-day vulnerabilities and kill-chain attack simulation, providing a continuous assessment of your threat defence posture.

### Add-on Services

eacs also provides a number of additional services which can augment the standard packages:

- A Virtual CIO providing board-level strategy and guidance;
- Continuous assessment of your Cloud Compliance in Azure;
- Assistance with achieving Cyber Essentials or Cyber Essentials+;
- Protection against Distributed Denial of Service attacks;
- Brandable security awareness training software;
- Protection of your brand with dark web & domain spoof monitoring;
- Validation of your email chain with DMARC, DKIM and SPF services.

Whatever your requirements, eacs has the solutions, services and expertise to optimise your security

## Overview

Each **eacs** OptimiseSecurity option offers a different level of protection based on your requirements, but with the option to add additional services should you require them

In addition, **eacs** can also offer you the following additional optional services:
