

Purchasing and Delivery Working Together in Partnership

eacs is delighted to announce it is now an approved supplier on Shared Business Services Digital Workplace Solutions Framework.

This Framework provides buyers with a compliant route to access cost effective, innovative IT hardware products. Our team of experts are ready to help you, whether it be laptops, tablets and printers, or leasing, deployment and warranty services.

The benefits of purchasing through SBS Link:

// PRE-VETTED AND AUDITTED SUPPLIERS

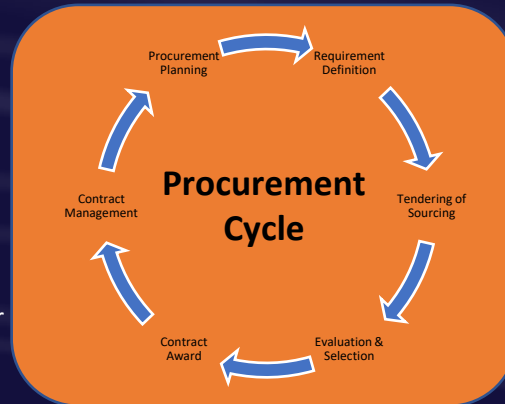

Access to an approved list of suppliers who have been rigorously vetted and evaluated to ensure they meet stringent standards

// COMPETITIVE PRICING

Supplier range ensures buyers are supplied with IT solutions tailored to their needs and with competitive pricing

// RATIONALISATION OF MARKET

No need for Public sector organisations to run their own tendering process.

// COST SAVINGS

By adopting a collaborative approach this enables lower pricing and cost-savings; by sharing the costs of programme management and procurement support.

// MINI-COMPETITION

Buyers are available to conduct a direct call off or undertake a mini-competition.

// QUALITY ASSURANCE

The framework provides assurance of supply for all IT hardware covered under the agreement and is fully OJEU compliant.

Scope of the Framework?

“The Digital Workplace enables new, more effective ways of working; raises employee engagement and agility; and exploits consumer-oriented styles and technologies”
